[recipient address was inserted here]

[recipient name was inserted here],

The Federal Communications Commission is considering taking actions that will restrict consumer choice by deregulating local phone service.

Millions of Americans like me could have their phone service threatened if the local phone companies arent required to allow competitors access to the market. Im also concerned about the Commissions move to relieve all broadband Internet access facilities of open access obligations.

Both of these key decisions will limit my choices as a consumer by lessening competition, diminishing cost savings and threatening consumer protections. As a constituent, I urge you to support competition and open access for local phone service.

Sincerely,

Ilse P. Munyon

In Delmont we have Alltel and in this area we have severely limited service. I have been waiting to see if other company could be more competitive. Republicans constantly talk of a free market but they seem to like to limit the market place.

The Federal Communications Commission is considering taking actions that will restrict consumer choice by deregulating local phone service.

Millions of Americans **like** me could have their phone service threatened if the local phone companies aren't required to allow competitors access to the market. I'm also concerned about the Commission's move to relieve all broadband Internet access facilities of open access obligations.

Both of these key decisions will limit my choices as a consumer by lessening competition, diminishing cost savings and threatening consumer protections. As a constituent, I urge you to support competition and open access for local phone service.

The Federal Communications Commission is considering taking actions that will deregulate local phone service.

If this does not pass, the local phone companies will not install broadband technology because they would have to sell to competitors at half the price it cost to install. Why would anyone spend \$10 so they can sell for \$5????

This may limit my choices as a consumer, but if you don't remove the restrictions I have no choice at all!!!!

Sincerely

John M. Kiszonas

The Federal Communications Commission is considering taking actions that will deregulate local phone service.

Since we've managed to practically destroy or block inovative solutions to our problems by effectively prohibiting the old "Bell" companies from investing in capital improvements, and because the forced resale of said capital investments at lower than cost have created a telecommunications market where everyone is a loser, especially the consumer, I believe the FCC changes should be saluted and supported by the Congress.

Sincerely,

Bob McCarthy

The Federal Communications Commission is considering taking actions that will restrict consumer choice by deregulating local phone service.

Millions of Americans like me could have their phone service threatened if the local phone companies arent required to allow competitors access to the market. Im also concerned about the Commissions move to relieve all broadband Internet access facilities of open access obligations.

Both of these key decisions will limit my choices as a consumer by lessening competition, diminishing cost savings and threatening consumer protections. As a constituent, I urge you to support competition and open access for local phone service

Sincerely,

RUSSELL N BARKER
